

Please reject NAB's petition 04-160I am a truckdriver and use xm satellite's radio service to get important information about road and weather conditions around the country by limiting xm's ability to offer this service you are forcing me and countless other truckdrivers to use less reliable and sometimes non existent services to access this information.Truckdrivers like myself rely on traffic and weather reports provided by xm satellite radio to operate our trucks safely and efficiently in often unfamiliar places.

Thankyou,

L. Dean
